**Phase One Environmental Site Assessment Update
839, 853 and 869 Hurontario Street & 7564 Poplar Sideroad
Collingwood, Ontario**

1.0 Introduction

G2S Consulting Inc. (G2S) was retained by Charis Developments Ltd. to complete a Phase One Environmental Site Assessment (ESA) Update for the property located at 839, 853 and 869 Hurontario Street & 7564 Poplar Sideroad in Collingwood, Ontario, hereinafter referred to as the 'Site'. Refer to Drawing 1 in Appendix A for the Site Location Plan. Authorization to proceed with the Phase One ESA Update was provided by Mr. Steve Assaff of Charis Developments Ltd.

The following Phase One ESA report was previously completed for the Site (excluding 839 and 853 Hurontario Street):

- a) *"Phase One Environmental Site Assessment, 869 Hurontario Street & 7564 Poplar Sideroad, Collingwood, Ontario,"* prepared by Terraprobe Inc. (File No. 31-14-1078) dated November 7, 2014.

As well, G2S completed the following report:

- Phase One Environmental Site Assessment Update, 839 and 869 Hurontario Street & 7564 Poplar Sideroad, Collingwood, Ontario," G2S21366A dated November 19, 2021.

G2S understands the proposed development includes commercial use (restaurants, retail, grocery store, offices), a parkette and mixed use commercial/residential tower. The current Site use is considered to be residential, and the proposed Site development includes residential and commercial. Since there will not be a change in land use to a more sensitive use, a Record of Site Condition (RSC) will not be required in accordance with O. Reg. 153/04, as amended. Therefore, the environmental site assessment (ESA) work was completed to meet the requirements of the CSA Standards.

2.0 Terms of Reference and Scope of Work

The purpose of this Phase One ESA Update was to determine the likelihood that one or more contaminants have affected the Phase One ESA Update property from present or past Site activities or from surrounding properties, since the completion of the Phase One ESA update in 2021. This Phase One ESA Update was completed in accordance with the general requirements of CSA Standard Z768-01, as amended, which outlines the protocol for Phase One ESAs and should be read in conjunction with the previous Phase One ESA reports.

This Phase One ESA Update incorporates the concept of Potentially Contaminating Activities (PCAs) and Areas of Potential Environmental Concern (APECs) identified by the Ministry of the Environment, Conservation and Parks (MECP) as outlined in Schedule D (O. Reg. 153/04).

The nature of a Phase One ESA by definition is a nonintrusive site examination of “readily accessible features”. Therefore, the Phase One ESA Update assessment does not quantify the chemical or physical quality of the exposed or inaccessible features such as materials beneath buildings or buried on Site. In this regard, the assessment must be viewed as a mechanism that may assist in reducing, rather than eliminating the uncertainty of encountering environmental contaminants during future use of the Site.

The Phase One ESA Update scope of work involved a records review, a Site visit, interviews, evaluation of the information gathered and preparation of this report.

3.0 Phase One Property Information

Table 1: General Site Details

Municipal Address	839, 853 and 869 Hurontario Street & 7564 Poplar Sideroad, Collingwood, Ontario
General Site Location	Northeast corner of the intersection of Hurontario Street and Poplar Sideroad. Pretty River tributary is located approximately 10 m north, Pretty River is located approximately 830 m east, and Nottawasaga Bay is located approximately 2.7 km north.
Approximate Site Area	3.9 hectares (9.6 acres)
Property Identification Number (PIN)	839 Hurontario Street: 58262-0078 (LT) 853 Hurontario Street: 58262-0076 (LT) 869 Hurontario Street: 58262-0787 (LT) 7564 Poplar Sideroad: 58262-0576 (LT)
Legal Description	839 Hurontario Street: PT S1/2 LT 40 CON 8 NOTTAWASAGA AS IN RO515907 (SECONDLY); COLLINGWOOD 853 Hurontario Street: PT S1/2 LT 40 CON 8 NOTTAWASAGA AS IN RO706547; COLLINGWOOD 869 Hurontario Street: PT S1/2 LT 40 CON 8 NOTTAWASAGA BEING PTS 1 & 2 51R32487 EXCEPT PTS 1 & 2 51R37017; TOWN OF COLLINGWOOD 7564 Poplar Sideroad: PT S1/2 LT 40 CON 8 NOTTAWASAGA PT 1 51R3533 EXCEPT PT 1 51R4531 & EXCEPT PT 4 51R37017; COLLINGWOOD
Current Site Owner	839 Hurontario Street: Assaff Investments Ltd. 853 Hurontario Street: Charis Developments Ltd. and Assaff Investments Ltd. 869 Hurontario Street and 7564 Poplar Sideroad: Charis Developments Ltd. 7564 Poplar Sideroad: Charis Developments Ltd.
Current Site Occupant	839 and 869 Hurontario Street and 7564 Poplar Sideroad: Vacant, undeveloped land. 839 and 869 Hurontario Street have never been developed, and 7564 Poplar Sideroad was historically developed with a residential home from approximately 1900-2007, when the building was demolished. 853 Hurontario Street: A single story residential dwelling.

The Phase One Study Area includes the Site and lands that are within approximately 150 metres of the Site, as shown on Drawing 2 in Appendix A, hereinafter referred to as the Study Area.

4.0 Records Review

4.1 Site Ownership

A land title search for the Site was conducted online using the Teranet Express website, for the Simcoe Land Registry Office.

- 839 Hurontario Street: There was a change in ownership from John and Carole Nell to Assaff Investments Ltd. (the current owners) in 2021.
- 853 Hurontario Street: There was a change in ownership to Costantino and Michelina Iadinardi in 1980 followed by transfer to Michelina and Andy Iadinardi in 2016. The Site was subsequently transferred to Chariff Developments Ltd. and Assaff Investments Ltd. (current owners) in 2023.
- 869 Hurontario Street: There was a change in ownership from Home Hardware Stores Limited to Tormin (Collingwood) Inc. in 2015, then from Tormin (Collingwood) Inc. to Charis Developments Ltd. (current owner) in August 2020.
- 7564 Poplar Sideroad: There was a change in ownership from Home Hardware Stores Limited to Tormin (Collingwood) Inc. in 2015, then from Tormin (Collingwood) Inc. to Charis Developments Ltd. (current owner) in August 2020.

The Land Registry documents are included as Appendix B.

4.2 Property Use Records

4.2.1 Waste Management Records

The Site and properties within the Study Area were searched by address in the Hazardous Waste Information Network (HWIN) and the Hazardous Waste Information System (HWIS) databases for records currently registered with HWIN. No PCAs were identified.

4.2.2 *Regulatory Information*

The MECP Brownfields Environmental Site Registry was searched online via the Access Environment Mapping tool and no records of RSCs for the Site or Study Area were noted. A permit for a stormwater management pond dated February 2018 was noted. No PCAs were identified.

The following new records were found for the Site or within the Study Area since the completion of the 2014 Phase One ESA:

- 7618 Poplar Sideroad (~30 m west): Technical Standards and Safety Authority (TSSA) records for a gasoline service station and three liquid fuel tanks on the property.

The occupant located at 7618 Poplar Sideroad was deemed to represent a potential PCA for the Site, which is included in Section 7.0 of this report. The environmental source information is included in Appendix C.

4.2.3 *Aerial Photographs*

An aerial photograph of the Site and Study Area for 2018 (included as Drawing 4 in Appendix A) was reviewed on the County of Simcoe website. As well, Google Earth satellite imagery dated August 2020 was reviewed.

A gas station has been developed at 7618 Poplar Sideroad since the 2014 Phase One ESA. No other changes to the physical setting of the Site and Study Area were identified through the aerial photographs. The Site and Study Area appear to be similar to that reported in the 2014 and 2021 Phase One ESA.

4.2.4 Previous Environmental Reports

Summaries of previous environmental reports for the Site are provided below:

Table 2: Summary of Previous Environmental Reports

Report Details	Summary
Title: Fill Investigation, 869 Hurontario Street, Collingwood, Ontario Date of Report: October 29, 2014 Author of the Report: Terraprobe Inc. Completed for: Georgian International Land Corp.	- During the Site visit as part of a Phase One ESA, it was noted that a significant amount of fill material was brought to the Site in December 2007/January 2008, for grading. - A fill investigation was recommended to determine the chemical quality of the soil on Site. - On September 23, 2014, ten boreholes were advanced through the existing fill pad on Site, to depths of 3.5 m below ground surface (bgs). Soil samples collected from the boreholes were submitted for analysis of petroleum hydrocarbons including benzene, toluene, ethylbenzene, and xylenes (PHCs and BTEX), and metals and inorganics. - Soils were identified as sandy silt to silty sand and gravelly sand fill underlain by native clayey silt with trace sand. Minor debris materials and occasional cobbles were encountered in the upper fill soils. No staining or odours were encountered in any of the samples. - All samples were compared to the Table 2 MECP full depth generic Site Condition Standards (SCS) for industrial/commercial/community (ICC) land use. No exceedances were identified. - Further environmental investigation was not recommended.
Title: Phase One Environmental Site Assessment (ESA), 869 Hurontario Street and 7564 Poplar Sideroad, Collingwood, Ontario Date of Report: November 7, 2014 Author of the Report: Terraprobe Inc. Completed for: Georgian International Land Corp.	- At the time of the report, the Site was undeveloped, vacant land. - The report indicated that 869 Hurontario Street had never been developed. According to a Site Assessment by Jacques Whitford (2007), the east portion of the Site (7564 Poplar Side Road) was previously occupied by a two-storey residential dwelling that had been removed at the time of the Phase One ESA in 2014. The dwelling was developed in the early 1900s. - Imported fill was located at the central portion of the property for grading purposes. The fill was brought to the site in previous years (appeared in a 2008 aerial photograph). - Properties within the Study Area were developed with residential and commercial properties, including: • 850 Hurontario Street (~30 m west) - Marty's Transmission and Walkers Small Motors Ltd. (PCA #57: Garage and Maintenance/repairs of vehicles) • 864 Hurontario Street (~30 m west) – Tilley of Canada Ltd. and John Brown Custom Sporting (PCA #54 – Textile Manufacturing, Processing, and Use) • 833 Hurontario Street (~45 m north) – Diane's Garden Centre - Two spills were indicated and included gas main damage at 47 Hughes Street and a 200 L diesel oil spill at County Road 124 and Poplar Sideroad. No environmental impacts were anticipated. - Groundwater flow was anticipated to be in a northeastern direction, towards Nottawasaga Bay, and surface drainage and shallow groundwater was expected to discharge into Pretty River and its

Report Details	Summary
	tributaries. - Due to the fill materials encountered during the Site visit, Terraprobe conducted a fill investigation (summarized above) to address the unknown quality of the fill material. Ten boreholes were advanced in the fill and submitted for chemical testing. All samples met the Table 2 MECP standards for Industrial/Commercial/Community land use. - The following PCAs were identified on Site and within the Study Area: • 869 Hurontario Street and 7564 Poplar Sideroad (Site): PCA #30 Importation of Fill Material of Unknown Quality • 850 Hurontario Street (~30 m west): PCA #57: Garage and Maintenance/repairs of vehicles • 864 Hurontario Street (~30 m west): PCA #54: Textile Manufacturing and Processing - As a result of the fill investigation and direction and distance of the PCAs within the Study Area to the Site, a Phase Two ESA was not recommended.
Title: Geotechnical Investigation Proposed Home Hardware Store, Collingwood, Ontario Date of Report: December 15, 2003 Author of the Report: Shaheen & Peaker Limited Completed for: Home Hardware Stores Limited	- The Geotechnical Investigation was completed in December 2003 and was required as part of the redevelopment process, which included a proposed Home Hardware Store. - On December 3, 2003, 11 boreholes were advanced on Site to a maximum of 5 m bgs. - Soil samples indicated a topsoil layer covered the entire Site with an approximate 300 to 400 mm thickness. A clayey silt deposit was identified under the topsoil to approximately 3 bgs. Silt was encountered beneath the clayey silt at thicknesses ranging from 0.5 m to 1.5 m. Silt till with some sand, some to trace clay, and some gravel was encountered beneath the silt layer in the deeper boreholes. - Groundwater levels were taken immediately post drilling activities. All boreholes were dry upon completion except for BH1, BH4, and BH5. Water levels were indicated at 1.3 m bgs in BH1, and BH4 and BH5 were filled with water to the ground surface due to ponded water.
Title: Phase One Environmental Site Assessment Update 839 and 869 Hurontario Street & 7564 Poplar Sideroad Collingwood, Ontario Date of Report: November 19, 2021 Author of the Report: G2S Consulting Ltd.	- The purpose of the Phase One ESA Update was to determine the likelihood that one or more contaminants have affected the Phase One ESA Update property from present or past Site activities or from surrounding properties, since the completion of the Phase One ESA in 2014 and should be read in conjunction with the previous Phase One ESA report. - The Phase One ESA Update identified one on-Site and three off-Site PCAs which were assessed based on observations of the operations, their location relative to the Site with respect to the inferred groundwater flow direction, their tenure, and expected chemical storage amounts etc. - Based on review and evaluation of the information gathered, the following APECs were identified: - APEC 1: Central portion of Site – Current and historical presence of a fill pad of unknown chemical quality fill materials, and the potential for fill materials to be present across the remainder of the Site. Chemical data

Report Details	Summary
	from 2014 requires confirmation due to the time elapsed. - APEC 2: Southwest portion of Site – Current use of the property located approximately 30 m west (7618 Poplar Sideroad) as a gasoline service station. - Based on the findings of the Phase One ESA Update, a Phase Two ESA was recommended to investigate the potential for contamination related to the above-noted APECs. - It is noted that a Phase Two ESA was conducted in 2021 by G2S. The results indicated that the soil and groundwater in the areas tested met the applicable MECP Table 2 ICC and/or Table 8 SCS. In this regard, no further investigation was recommended. The 2021 Phase Two ESA report was also updated by G2S in 2024. Refer to the report for particulars.

5.0 Interviews

5.1 Site Personnel

A Phase One ESA Questionnaire was completed by the Site President, Mr. Stephen Assaff of Charis Developments Ltd., and is included in Appendix D. No new information was provided by Mr. Assaff for this current update.

5.2 Third Party Individuals

Third party individuals were not available for interview at the time of this Phase One ESA.

5.3 Government Officials

The following government officials were contacted as part of this Phase One ESA:

1. Ministry of the Environment, Conservation and Parks (MECP), Freedom of Information and Protection of Privacy Office.
2. Technical Standards and Safety Authority.

6.0 Site Reconnaissance

Observations of the Site, adjacent and surrounding properties were conducted by walking over the Site. Adjacent and surrounding properties were observed from within the Site or by other public means. Refer to Drawing 3 (Site Plan) in Appendix A. Photographs of the Site and the Study Area are included in Appendix E.

Table 3: Site Reconnaissance

Date	June 6, 2024
Time	9:00 am
Weather	Sun and cloud, approximately 19° Celsius
Person who conducted the Site visit	Dylan Brice, Senior Field Technologist
Qualified Person supervising the Site visit	Melissa King, P.Geo.
Facility Operating: Yes/No	No

6.1 Observations

The following observations were made on-Site during the Site visit:

- The Site remains vacant, undeveloped land at addresses 839 and 869 Hurontario Street and 7564 Poplar Sideroad. The fill pad is still located at the central portion of the Site.
- Vegetation covers most of the Site.
- 853 Hurontario Street is a residential property with a storey house. No indication of historic or current fuel storage tanks were observed on the interior or exterior of the residential building.

6.2 Adjacent Land Uses

The Site is located in an area consisting of residential and commercial land use. Changes to the surrounding properties since the completion of the 2014 and 2021 Phase One ESA that represent Potentially Contaminating Activities (PCAs) within the Study Area include:

- 850 Hurontario Street (~30 m west): Walkers Small Motors (PCA #10 – Commercial Autobody Shops) (1980-current)
- 7618 Poplar Sideroad (~30 m west): MacEwen Collingwood (PCA #28 – Gasoline and Associated Products Storage in Fixed Tanks) (2015-current)

The above PCAs are summarized in Section 7.0 of this report.

7.0 Review and Evaluation of Information

7.1 Current and Past Site Uses

The current and past Site uses are summarized in the following table:

Table 4: Summary of Current and Past Site Uses

Site		
Address	Property Use	Years Occupied
839 Hurontario Street	Vacant undeveloped land	At least 1954 - current
853 Hurontario Street	Vacant undeveloped land	At least 1954 ~ 1970s
	Residential	~1970s- - current
869 Hurontario Street	Vacant undeveloped land	At least 1954 - current
7564 Poplar Sideroad	Vacant undeveloped land	2008-current
	Residential	~1900-2007
	Undeveloped	<1900

7.2 Potentially Contaminating Activities (PCAs)

The following PCAs were identified on-Site or on properties within the Study Area, and have either been present since the completion of the 2014 and 2021 Phase One ESA or have occurred within the Study Area following the 2014 Phase One ESA:

Table 5: Potentially Contaminating Activities

Address Direction and Distance from Site	Potentially Contaminating Activity Refer to Table 2, Schedule D O.Reg. 153/04	Description	Date(s)	Results in an APEC (yes/no)
869 Hurontario Street and 7564 Poplar Sideroad (Site)	PCA #30 – Importation of Fill Material of Unknown Quality	Fill pad located in central area of Site, since approximately 2008, potential fill across remainder of Site.	2008-current	Yes – APEC 1
7618 Poplar Sideroad (~30 m west)	PCA #28 – Gasoline and Associated Products Storage in Fixed Tanks	Current use of the property by MacEwen Collingwood as a gasoline service station.	2015-Current	Yes – APEC 2
850 Hurontario Street (~30 m west)	PCA #10 – Commercial Autobody Shops	Current and historical use of the property by Walkers Small Motors as an auto repair shop.	1980-Current	No. Building located ~45 m west of the Site, transgradient with respect to

Address Direction and Distance from Site	Potentially Contaminating Activity Refer to Table 2, Schedule D O.Reg. 153/04	Description	Date(s)	Results in an APEC (yes/no)
				groundwater flow direction relative to the Site.
864 Hurontario Street (~30 m west)	PCA #54 – Textile Manufacturing, Processing, and Use	Tilley of Canada Ltd. and John Brown Custom Sporting	1947	No. Large-scale operations not expected due to size of units in the building onsite.

Notes: PCA – Potentially Contaminating Activity
 APEC – Areas of Potential Environmental Concern

7.3 Areas of Potential Environmental Concern (APECs)

Table 6: Areas of Potential Environmental Concern

APEC No.	Description of APEC/ Rationale	Location of APEC on Phase One Property	PCA	Location of PCA (on-Site or off-Site)	COPCs	Media Potentially Impacted (Groundwater, soil and/or sediment)
1	Current and historical presence of a fill pad of unknown chemical quality fill materials; potential fill across remainder of Site. 2014 data requires confirmation.	Entire Site	PCA #30 – Importation of Fill Material of Unknown Quality	On-Site	PHCs, BTEX, VOCs, PAHs, metals and other regulated parameters (As, Sb, Se, B-HWS, CN ⁻ , Cr (VI), Hg, EC, SAR	Soil
2	Current use of the property located ~30 m west as a service station.	Southwest portion of Site	PCA #28 – Gasoline and Associated Products Storage in Fixed Tanks	Off-Site: 7618 Poplar Sideroad	PHCs, BTEX, VOCs, metals	Soil, Groundwater

Notes: PCA – Potentially Contaminating Activity COPCs – Contaminants of Potential Concern
APEC – Areas of Potential Environmental Concern PHCs – Petroleum Hydrocarbons
BTEX – Benzene, Ethylbenzene, Toluene, Xylenes VOCs – Volatile Organic Compounds
PAHs – Polycyclic Aromatic Hydrocarbons; As - Arsenic; Sb – Antimony; Se – Selenium; B-HWS – boron hot water soluble; CN⁻ - free cyanide; Cr (VI) – Chromium VI; Hg – mercury; EC – Electrical Conductivity; SAR – sodium adsorption ratio

8.0 Conclusions and Recommendation

The purpose of this Phase One ESA Update was to determine the likelihood that one or more contaminants have affected the Phase One ESA Update property from present or past Site activities or from surrounding properties, since the completion of the Phase One ESA in 2014 and 2021 and should be read in conjunction with the previous Phase One ESA reports.

The Phase One ESA Update identified one on-Site and three off-Site PCAs which were assessed based on observations of the operations, their location relative to the Site with respect to the inferred groundwater flow direction, their tenure, and expected chemical storage amounts etc. Based on review and evaluation of the information gathered, the following APECs have been identified:

- APEC 1: Central portion of Site – Current and historical presence of a fill pad of unknown chemical quality fill materials, and the potential for fill materials to be present across the remainder of the Site. Chemical data from 2014 requires confirmation due to the time elapsed.
- APEC 2: Southwest portion of Site – Current use of the property located approximately 30 m west (7618 Poplar Sideroad) as a gasoline service station.

Based on the findings of this Phase One ESA Update, a Phase Two ESA is recommended to investigate the potential for contamination related to the above-noted APECs.

It is noted that a Phase Two ESA was conducted in 2021 by G2S. The results indicated that the soil and groundwater in the areas tested met the applicable MECP Table 2 ICC and/or Table 8 SCS. In this regard, no further investigation was recommended. The 2021 Phase Two ESA report was also updated by G2S in 2024. Refer to the report for particulars

It should be noted that if a Record of Site Condition (RSC) is required for the Site under O.Reg. 153/04, further investigation may be required. RSCs may be requested under a few circumstances, such as a condition of financing or as a condition by the Municipality for the proposed development.

9.0 Qualifications of the Assessor

This Phase One ESA Update was conducted by Ms. Cait Worona, B.Sc who has been trained to conduct Phase One and Two ESAs in accordance with the CSA and O. Reg. 153/04, as amended. She is an Environmental Scientist with over 2 years of professional experience specializing in Phase One and Phase Two ESAs, project management, and site cleanup/remediation. She has completed numerous projects on behalf of private and public-sector clients for industrial, commercial, and residential sites.

This Phase One ESA Update was prepared under the supervision of, and the report was reviewed by Melissa King, a Professional Geoscientist registered with the Professional Geoscientists of Ontario. Ms. King is a Senior Geoscientist and Head of Environmental Services and is a Qualified Person (QP). She has over 25 years of interdisciplinary professional experience specializing in environmental and hydrogeologic investigations and project management. Her main areas of expertise include Phase One and Phase Two ESAs, site cleanup / remediation planning and supervision, site remediation, Risk Assessment, Records of Site Condition and hydrogeologic investigations. She has completed hundreds of projects for commercial, industrial, and residential clients for a wide variety of project types (industrial complexes, commercial developments, entertainment and institutional buildings, and residential development).

11.0 Limitations

This Phase One Environmental Site Assessment (ESA) Update has been prepared for the sole benefit of Charis Developments Ltd. and is intended to provide a Phase One ESA Update on the Site, 839, 853 and 869 Hurontario Street & 7564 Poplar Sideroad in Collingwood, Ontario. The Phase One ESA Update may not be used by any other person or entity without the expressed written consent of Charis Developments Ltd., and G2S Consulting Inc. (G2S). Any use which a third party makes of this Phase One ESA Update, or any reliance on decisions made based on it, is the responsibility of such third parties. G2S accepts no responsibility for damages, if any suffered by any third party as a result of decisions made or actions based on this Phase One ESA Update.

The findings in this Phase One ESA Update are limited to the conditions at the Site at the time of this investigation (June 2024) and supplemented by a historical review and data obtained by G2S as described herein as well as information provided by the Site representative as reported herein. Conclusions presented in this Phase One ESA Update should not be construed as legal advice.

If Site conditions or applicable standards change or if any additional information becomes available at a future date, changes to the findings, conclusions and recommendations in this Phase One ESA Update may be necessary.

12.0 Closing Remarks

We trust this report is satisfactory for your purposes. Should you have any questions, please do not hesitate to contact this office.

Yours truly,

G2S Consulting Inc.

Dear Caitlin Worona:

RE: **MECP FOI A-2024-03510 – Decision Letter**

This letter is in response to your request made pursuant to the Freedom of Information and Protection of Privacy Act (the Act) relating to:

853 Hurontario Street, Collingwood

After a thorough search through the ministry files, no records were located responsive to your request. The official responsible for making the access decision on your request is the undersigned.

You may request a review of my decision within 30 days from the date of this letter by contacting the Information and Privacy Commissioner/Ontario at <http://www.ipc.on.ca>. Please note there may be a fee associated with submitting the appeal.

If you have any questions, please contact Jessica Wilson at shannon.neita@ontario.ca.

Yours truly,

Shannon Neita

To:Cait Worona <caitw@g2sconsulting.com>

Hello,

NO RECORDS FOUND IN CURRENT DATABASE:

• We confirm that there are NO **fuels records** in our database at the subject address(es).
This is not a confirmation that there are no records in the archives. For a further search in our archives, please go to the [TSSA Client Portal](#) to complete an Application for Release of Public Information.

Please refer to [How to Submit a Public Information Request \(tssa.org\)](#) for instructions.

The associated fee must be paid via credit card (Visa or MasterCard).

Once all steps have been successfully completed you will receive your payment receipt via email.

TSSA does not make any representations or warranties with respect to the accuracy or completeness of any records released. The requestor assumes all risk in using or relying on the information provided.

If you have any questions or concerns, please do not hesitate to contact our Public Information Release team at publicinformationservices@tssa.org.

Warm regards,
